

1. Knot Brokis

Knot is a collection of stately pendant lights that oppose two dramatically dissimilar materials. The design combines coarse natural fibre with smooth, transparent blown glass to arouse a contrast as striking as it is dignified. Full-bodied globes of varying shapes and sizes are penetrated by robust cords for a bemusing plastic effect.

6. Phenomena Bomma

Designed by Dechem Studio, the Phenomena collection was inspired by simple shapes: a circle, a triangle, a rectangle and an oval. The term phenomenon comes from the Greek word for appearance. Phenomena are transient, a fitting name for a collection made in a material that is so difficult yet versatile, such strong yet fragile glass.
