

#### 1. I Model Anour

Made in Denmark, I Model adds elegance and beauty to any room. Available in copper, brass and steel, I Model is individually surface treated, resulting in a finely structured surface. Anour lamps are available in nine unique surface treatments to suit your personal preference, with special sizes available on request.

#### 2. Mahari Nahoor

Perched at the end of an adjustable arm is the cylindrical light of William Pianta's Mahari table lamp for Nahoor, which occupies the space without invading it. It functions according to the needs of the user: sources of light modulate and broaden the horizons and can create a new visual order of space.

#### 3. Float SkLO

Float is a large sphere of transparent coloured Czech glass. Each glass sphere, available in 16 or 20 inch diameter, is broken hot from the glass master's pipe and then the mouth is torch-polished to create a unique detail. Two thumb screws attach the removable brass socket from the glass sphere on one side.

#### 4. Classic S Clear Thermo Lamp

The S series introduces the new flexible LED filament technology into Thermo Lamp's current LED light bulbs. Classic S is a true reproduction of the original Edison light bulbs. They emit light in a soft and warm tone of 2,200K with a high CRI, high PF and are dimmable. The S series includes the Edison shape as well as the Linestra model.

#### 5. Sirius Eloa

Sirius combines the liveliness of light with the beauty of organically rounded horizontal shapes, to bring a majestic feeling of levitation into any space. Its iridescent hues sparkle, suspended from the ceiling, with its irregular form creating an impression of quiet movement throughout the room.

#### 6. Curved Style Segula

Segula prides itself on innovation and premium quality. The Curved Style and Ambient Dimming ranges compliment the traditional Vintage Range and offer new shapes and glass variants that open up the material-efficient and environmentally friendly LED lamps for even wider fields of applications.
